

## **Blended Learning Instructor**

Method Schools is dedicated to providing breakthrough educational tools and practices that deliver maximum results for all families. The Method educational program is made up of a combination of data-driven practices, collaborative learning and virtual content all delivered in a blended and virtual environment to challenge and engage students. Teachers report to the Lead Teacher and Method co-founders and are facilitators of the effective implementation and refinement of the educational program.

As part of the Method professional development plan, the Teachers will be instructional experts in the following categories:

- Pedagogy: Blended Learning- Teacher training on how to integrate technology into standards-based instruction and research-based teaching practices.
- Systems Expertise: Comprehensive systems training for enhanced content knowledge and data driven practices.
- Teacher Collaboration: Participate in a culture of collaborative learning not only with the students, but amongst the staff through practices such as breakthrough 10.

Key Responsibilities of Teachers include:

- 1) Implement the Method educational program
  - Ongoing development of supplemental projects aligned to the online curriculum
  - Effective operations of the iRotate and iFlex models
  - Manage student data within all systems to continuously refine instructional practices to improve student performance
  - Follow procedures of Student Personalized Plans and Response to Intervention to personalize each student's academic path.
  - Meet regularly with students to monitor progress
  - Exhibit best practices of blended learning environments
- 2) Collaborate with instructional staff
  - Utilize instructional support within the iRotate and iFlex models
  - Participate in breakthrough 10
  - Take part in team, grade level, and subject area collaborations
  - Contribute to the collaborative culture amongst the amongst students and teachers of the school
- 3) Ensure effective use of technological systems and independent study policies and procedures
  - Maximize the usage of all systems to align to a data-driven instructional approach
  - Follow procedures that maximize efficiency and compliancy within independent study requirements
- 4) Maintain effective operations of Method school sites
  - Refine and monitor effectiveness of master schedule
  - Ensure safe and healthy conditions at school sites
